## MANAGEMENT SYSTEMS

Snam's commitment has also continued to expand and maintain management systems that oversee specific issues such as occupational health and safety, the environment and the quality of services provided. During the year, Snam implemented all the activities necessary to extend the management system certifications to the new companies entering the scope of consolidation and to maintain and update other existing certifications.

Company	Certification scope	Certification	Year of first certification
Snam	Management of operational continuity for the planning, development, centralised management of process and remote control systems for the dispatching of natural gas transport	ISO 22301	2018
