### REPORTING PROCESS AND METHODOLOGY

The process of preparing the report was coordinated and managed by the CSR unit of the parent company Snam, in cooperation with the other corporate functions and operating companies. Publication of the document, concurrent to the Annual Report, was subject to the approval by the Snam Board of Directors on 17th March 2021. The report contains the data and information relevant to the understanding of the Group's activities, selected consistently on the basis of a structured materiality analysis, which made it possible to identify the most relevant sustainability issues for the Group and its stakeholders, which is described in the paragraph "Listening to stakeholders".

The economic and financial, operating and governance data was taken directly from the Annual Report and from the Corporate Governance and Ownership Structure Report. Data concerning the environment, employees and the other aspects addressed in the document were gathered from the process owners.

The calculation methodology used to determine the figures are indicated in the specific related sections. To ensure the comparability of the most significant indicators over time and to allow the reader to compare the performance achieved, figures have been compared with those of the previous two years, using graphs and tables. Within the document, an attempt has been made to give equal prominence to the positive and negative aspects, providing, where appropriate, a commentary on the results obtained.

## ASSURANCE

The report was subjected to a limited assurance engagement according to the criteria indicated by the "International Standard on Assurance Engagements ISAE 3000 Revised - Assurance Engagements Other than Audits or Reviews of Historical Financial Information" principle, issued by International Auditing and Assurance Standards Board (IAASB), by part of Deloitte & Touche S.p.A., which is expressed in a specific "Independent Auditor's Report" reported below in the document. The opinion of the auditing firm and the related verification activities did not concern the information relating to the SASB and TCFD recommendations.
